Proposed Creative Europe project – to which project are you looking for partners?

Sector or field	<i>Dumpster diving, conservation, sustainability, waste management, cultural heritage, community, circular economy, technology.</i>
Description or summary of the proposed project	Madrid is a city where a huge amount of waste is discarded while still functional. There is no widely-known alternative to throwing any item –even in perfect state– to the waste management or abandoned in the streets (which is forbidden). Resucitadero aims to fill this gap and provide a solid, reliable network to manage the goods that citizens do not want anymore but still have a potentially wide lifespan. It is a space where to gather, classify, store, repair, clean, refurbish, test and sell goods that otherwise would have ended up in a landfill. As a non-profit association, the final prices are strictly set up accordingly to the work accomplished. We spent some years practicing the lifestyle of dumpster diving, rescuing goods and materials to give them a second life (if not more). We have experience collecting in the streets, repairing and upcycling in the workshop. We have developed the ability to spot and pick potential rescuable items.
